

# Uniswap Gold

WHITEPAPER

#### **ABSTRACT**

**Cryptocurrency** is an internet-based medium of exchange which uses cryptographical functions to conduct financial transactions.

Crypto currencies leverage blockchain technology to gain decentralization, transparency, and immutability.

Cryptocurrency is not controlled by any central authority: the decentralized nature of the blockchain makes cryptocurrencies theoretically immune to the old ways of government control and interference.

The popular cryptocurrency and blockchain system known as Ethereum is based on the use of tokens, which can be bought, sold, or traded.

In this case, "tokens" represent a diverse range of digital assets. In this way, tokens are essentially smart contracts that make use of the Ethereum blockchain.

**UniswapGold (UNIG)** Is an ERC20 incentive-based cryptocurrency token.

A key point of the UniswapGold ecosystem is the ability to implement features using smart contracts.

uniswapgold aims to systematize built-in Passive Income Protocol and develop Defi wallet for Merchant Payment fast and securely with the use and implementation of smart contracts

# Introduction

If we can email virtually anybody in the world, why can't we send them money just as easily? Or make payment online securely and easily? These questions are the foundation of Decentralized Finance's (DeFi) beliefs, activities and objectives.

In short, DeFi refers to an ecosystem of financial applications that are built on top of a blockchain.

Its common goal is to develop and operate in a decentralized way—without intermediaries such as banks, payment service providers or investment funds — all types of financial services on top of a transparent and trust blockchain network.

The DeFi field is currently experiencing an incredible surge. More than two billion US Dollars (USD) – a value that doubled over the last weeks in June 2020 – have already been deployed

**UniswapGold** is a Global Decentralized Finance wallet cryptocurrency payment provider for Merchants.

It allows businesses to Send, Receive, Stake, Store, Exchange, Lending, and Accept CryptoCurrency Payments online, safely, securely, and cost-effectively across the world in a matter of minutes.

A highly secure, reliable, and scalable wallet solution from a reputable, industry-leading cryptocurrency payments provider.

# **Problem**

#### - CRYPTOCURRENCY WALLETS LACK SECURITY:

Though cryptocurrency wallets are built to be secure, the level of security varies across wallets. The inconvenience with digital wallets is that if the cryptocurrency exchange gets hacked, then it becomes very easy to get hold of the money, as there is no password that is tied to the wallet. Usually, there is a single wallet file containing numerous unique addresses tied to a single user account. The problem escalates when the hacker gets hold of the wallet file because the money is gone for every user account that is connected to that wallet. Thus, one can clearly envision that her cryptocurrency wallet is one among thousand others that are threatened until a strong security mechanism is in place.

#### - CRYPTOCURRENCY WALLETS DO NOT DEAL IN NON-CASH ASSETS:

Cryptocurrency wallets deal with storage and management of cryptocurrencies such as Bitcoin and Ethereum. But most cryptocurrency wallets do not support elements of a 'programmable economy' such as non-cash assets, IDs, information, and smart contracts to name a few. Moreover, they can neither exchange loyalty points, nor transfer value to/from cryptocurrencies. Moreover, the wallet is not compatible with businesses that do not deal with bitcoin or ethers and hence completely ignore them.

# UniswapGold Solution

- **-Exchange and Payout :** Afraid of the high daily price fluctuations of cryptocurrencies? Don't be! The exchange rate is fixed and you always receive what your goods and services cost in EUR or USD, USDT
- -Increase Your Sales: Start accepting payments with various digital currencies such as Bitcoin, Litecoin, and Ethereum.

  Open your doors to a customer base from all parts of the world!
- -Highly Competitive Pricing: We do not charge you any setup or hidden fees. We actually do not charge you any fees! Your clients bear a small commission
- -Dapps: UniswapGold is also developing their own Dapp running on the Ethereum Network, allowing users to use it from any of their favorite wallet (Trust wallet, MEW, Metamask, etc.) to search and use their Decentralized Ecosystem.
- -The UniswapGold Passive Income Protocol operates with the principle of cryptocurrency staking.

  On the UniswapGold Users can stake UNIG Tokens for UNIG Tokens or other ERC20 tokens the on Uniswap Gold wallet, lend, store or borrow crypto assets, swap from one token to another and wrap non ERC20 tokens to compatible versions of the tokens

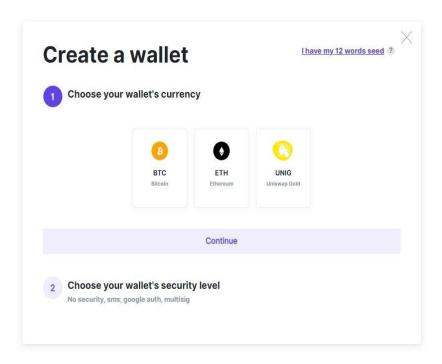

**-Easy-to-integrate API**: You can integrate our merchant payment processing solution with your website in no time, just follow our clear API documentation

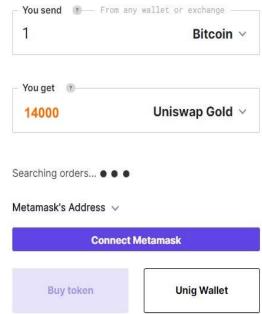

# UniswapGold Wallet

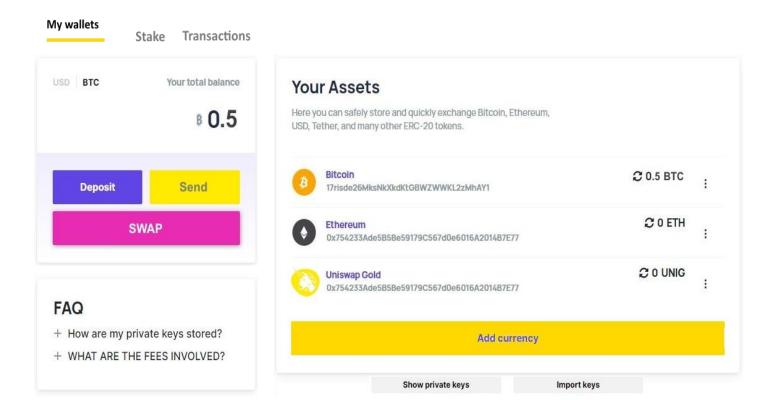

We'll build a DeFi Wallet to pay your expenses, easily and safely

UniswapGold fast and secure payment solution, you can now swap tokens, stake, shop with your favorite merchant

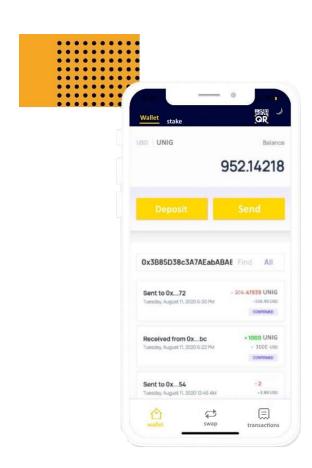

#### - Windows and Mac Wallet Beta

#### - Android and ios wallet beta

# Uniswap Gold Mobile App

Launching Soon!

### **UNIG Token**

#### **UNIG Token:**

**UNIG Token** is a governance token of the UniswapGold project.

The token will be used to gain full access to all UNIG DeFi payment products.

It is really a useful Token, It will have multiple usage fees, and we will build more Defi products on one ecosystem, So it will succeed in increasing its value permanently.

#### **Details And Information:**

Token Name: UniswapGold

Token Ticker: UNIG

Token Type: ERC20

#### **Token Cap, Price And Supply:**

**Token Sale Price Start:** 0.1 ETH

Max Supply: 100,000,000 UNIG

SoftCap: 800 ETH

HardCap: 1,500 ETH

#### **Contract Address:**

0x6e587CcF34B20ef06Aa7595070ef3e40da491F9F

## **UniswapGold Tokenomics:**

Presale - 30%

Liquidity Pool - 20%

Staking Pool - 24%

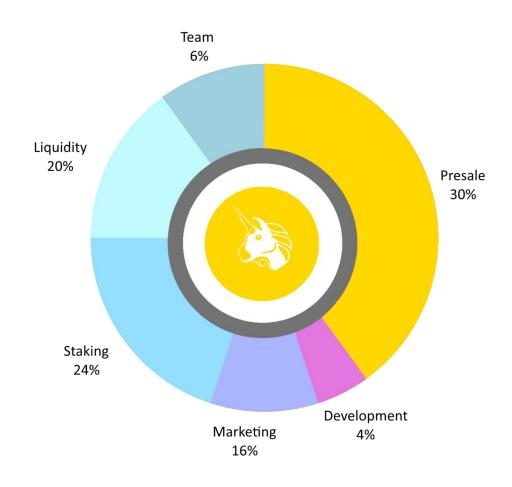

Development - 4%

Marketing & Airdrops - 16%

UNIG Team - 6%

#### (Team 6% will be locked for 6 months)

## **Distribution Graph:**

# RoadMap

#### Q4 2020

- -1 st marketing campaign.
- -UNIG Presale at our website.

#### Q1 2021

-Uniswap liquidity: 20000000 UNIG.
-listing at Hotbit, MXC, Kucoin, Coinmarketcap.
-Launch Beta Wallet version release.
-first burning 5% of the total supply.

#### Q2 2021

- -Second Burning 10% of the total supply.
- launch Wallet Dapp full version release.
- launch of the staking program.

#### Q3 2021

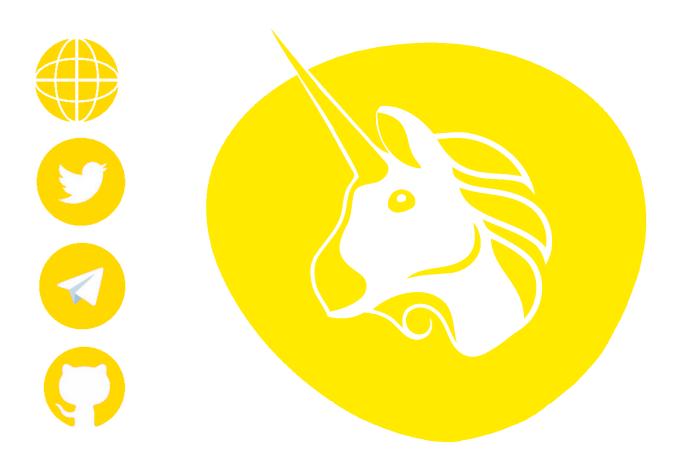

-Third Burning 10% of the total supply.
-Attract more partners; Restaurants, Shops ...
-Listing on the top 10 CMC exchanges.

#### Q4 2021

- -Development of Mobile App Wallet(Android-iOS)
- -Burning 15% of the total supply

The consistency will be upheld by an efficiently coordinated management to systematize the ecosystem as well as a well-thought-out business model to improve and add monetary values to the project in its entirety.

The completion of each item on the roadmap will validate trust, our trust is the platform, the platform is our community.
